**\*\*Advancements in Drone Technology for Wildlife Conservation\*\***

Drone technology has revolutionized the way conservationists monitor and protect wildlife. Nonprofit organizations like the Wildlife Conservation Society and the World Wildlife Fund have begun employing drones to patrol vast stretches of habitat that are otherwise difficult to access. Drones equipped with cameras and sensors can track animal movements, detect poachers, and even collect data on environmental conditions. This technology allows for real-time monitoring of endangered species and can significantly increase the effectiveness of conservation efforts. Furthermore, drones minimize human interaction with sensitive ecosystems, thus reducing the risk of disturbing wildlife.

- B 31 What role does drone technology play in wildlife conservation according to the passage?  
 (A) enhancing security in urban areas  
 (B) improving monitoring and protection of wildlife  
 (C) increasing air traffic  
 (D) monitoring weather patterns
- B 32 Which organizations are mentioned as using drones for conservation?  
 (A) Apple and Google  
 (B) Wildlife Conservation Society and World Wildlife Fund  
 (C) United Nations and Greenpeace  
 (D) NASA and SpaceX
- B 33 What capabilities do drones have that aid in conservation efforts?  
 (A) They can carry heavy equipment.  
 (B) They can track animal movements and collect environmental data.  
 (C) They can be used for commercial delivery services.  
 (D) They provide entertainment through drone racing.
- C 34 How do drones benefit the monitoring of endangered species?  
 (A) They train animals to interact with technology.  
 (B) They create more habitats for animals.  
 (C) They offer real-time monitoring and increase conservation effectiveness.  
 (D) They pollute the habitats with noise.
- A 35 Why is minimizing human interaction with ecosystems important in conservation?  
 (A) It reduces the risk of disturbing wildlife.  
 (B) It allows humans to live closer to wildlife.  
 (C) It increases the biodiversity of the area.  
 (D) It makes the ecosystems dependent on technology.
